TIPS FOR SUCCESS

THE WIMPY

Troll Minions

Troll minions are the foot soldiers of the troll army. They mostly shoot arrows, but some bosses train their minions to use other weapons.

Minion Morale Bar

Minions are expendable, so the Troll Boss doesn't care much if a few get stomped in his blind rage. However, if they get pushed too far, they might end up betraying the boss in mutiny.

Take cover behind obstacles

Take brief refuge on top of a rock

Lead the Boss in the way of minion arrows
